## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments filed 9/23/2003 have been fully considered but they are not persuasive. Applicant's argument that Mira neither teaches nor suggests both the curved and bent configuration of the claimed fin, has been very carefully considered but is not deemed to be persuasive. See the rejection as bellow. The claims as amended and added are also moot in view of the new ground of rejection.

### ***Specification***

The specification is objected to as failing to provide proper antecedent basis for the claimed subject matter. See 37 CFR 1.75(d)(1) and MPEP § 608.01(o). Correction of the following is required: the claimed subject matter of "at least one portion of each of said fins is bent along its height" and "the fins being bent along their height" are not provided in the specification.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-3 and 36-42 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The subject matters of " at least one portion of said fin is bent along its

Art Unit: 3743

height” and “the fins being bent along their height” was not supported by the disclosure. It appears in figure 7 that the upper portion (208) does not bent along the fin height but rather bent at an intersection between the upper portions (208) and the vertical portions (207).

Claims 1-3,36-38 and 40-42 are further rejected as can be best understood by the examiner.

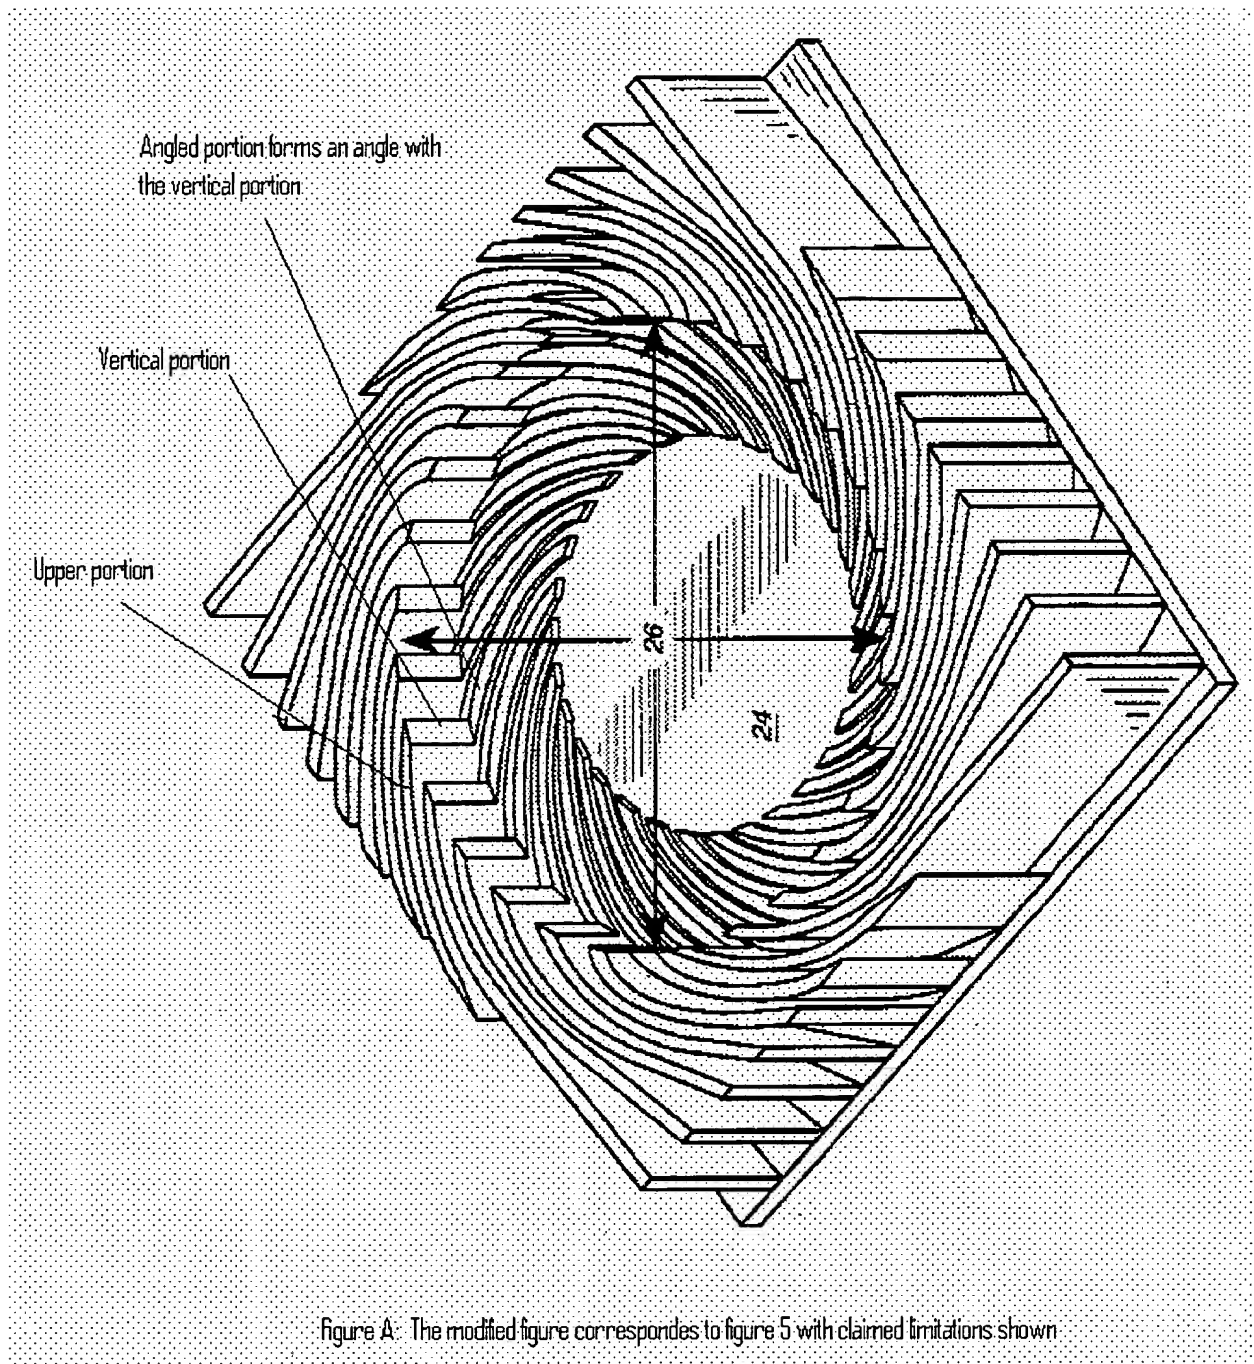

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3,36-38 and 40-42 are rejected under 35 U.S.C. 102(b) as being anticipated by Mira (US 5,661,638). Mira discloses (figures 5-6 and column 3, line 56-column 4, line 2) a heat sink comprising a core (24) having a central axis; and a plurality of cooling fins (22) arranged about the core, wherein the fins (22) extending radially away from the core (24) and the fins (22) has been curved (bent) along its height (the curved portion extending from top to bottom edges of fin) to obtain arc-shaped fins (22) in order to capture at least a part of tangential component of airflow. Mira further discloses (figure 6 and figure A as bellow) that each fin (22) has a vertical portion and an angled portion, which also bent in the same direction. It appears in figure A that the vertical portion and the angled portion form a 90 degrees angle.

### ***Conclusion***

The non-application of art against claim 39 should not be construed as an indication that the claim contains allowable subject matter.

Art Unit: 3743

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
